# FRAUNHOFER- INHAUS-CENTER

FRAUNHOFER-INHAUS-CENTER FOR  
INTELLIGENT ROOM AND BUILDING SYSTEMS

## TOGETHER TOWARDS TOMORROW

### EXPLORE FUTURE!

Do you already know how the future looks like?  
Even we cannot give you a single answer to this – because  
that's not how future works.

Understanding the future grows out of spontaneous communication and unpredictable impulses and is nothing that can be predicted today. Through lively exchange with many companies and different research facilities you can define chances and markets that do not yet exist. With about 100 partners, we would like to provide you the platform that helps you to see into the future.

Research and design future – well connected – in the  
Fraunhofer-inHaus-Center.

### We offer competences in the following areas:

- Health and Care
- Living
- Energy transparency / efficiency
- Human-technology interaction
- Security & Safety
- Electronical assistance
- Sustainability

## HEALTH AND CARE

Development of technologies for sustainable and innovative health and care.

### RECOGNIZE FUTURE!

The possibilities to extend your business area are today better than ever before. The demographic change requires new, better solutions to simplify the everyday life of citizen. Simultaneously the digital networking and sensor technology with volatile developments introduces more and more fields of applications. Resource scarcity becomes a more desperate problem that needs to be faced off with new materials, designs and production methods in the future.

### DESIGN FUTURE!

Founded in 1949, the Fraunhofer-Gesellschaft is the leading organization for applied research in Europe. It maintains 67 institutes and research facilities with more than 25,000 employees worldwide. This strong basis of years of know how makes application and customer oriented or completely free research possible and successful. A stable network consisting of research partners and companies in the whole world helps you to realize your projects successfully and securely.

### BECOME AN INHAUS-PARTNER

From small startups to global companies, a partnership with the Fraunhofer-inHaus-Center enables you to open up new markets, find ideas and realize your projects.

- Let yourself be inspired by active exchange with partners from industry and research institutes.
- Secure yourself with the knowledge of the Fraunhofer-Gesellschaft in research and development.
- Benefit from flexible cooperation packages and the demonstration, test sites and conference facilities in the inHaus-Center.

Become partner today, design future tomorrow!  
[www.inhaus.fraunhofer.de/en/Partners.html](http://www.inhaus.fraunhofer.de/en/Partners.html)

### LIVING

Development of new technology, system and application solutions for future living concepts.

### ENERGY AND BUILDING TECHNOLOGY

Demonstration of new systems for energy efficient operations.

### SUSTAINABILITY

Research and development of innovations for a sustainable handling of resources.
